REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record teaches A liquid crystal display device, comprising: a lower substrate including a second soda lime glass material [201 and example 7], a transparent **inorganic** insulator on the second soda lime glass material [SiO₂ layer 216 as taught in example 7], and a thin film transistor on the transparent organic insulator; and a liquid crystal material layer interposed between the upper substrate and the lower substrate. The prior art of record also teaches an upper substrate including a first soda lime glass material, an ion blocking layer on the first soda lime glass material, a color filter layer, and a common electrode [see Materials and Assembling Process of LCDs]. The prior art of record does not teach nor suggest a transparent **organic** insulator on the second soda lime glass material in combination with the limitations supra.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Dudek whose telephone number is 571-272-2290. The examiner can normally be reached on 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on 571-272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
